

Press release by Gebr. FALLER GmbH

Colourful diversity – 2020 New Item Presentation. Part I

Gütenbach/Black Forest, January 2020 – **Gebr. FALLER GmbH will show from 29th January to 2nd February at the 71st Toy Fair in Nuremberg – on over 200 square metres and 15 new installations and show-areas – the first half of its comprehensive range of new items for 2020 pertaining to house brands FALLER and POLA G as well as a selection of its 24 marketing brands. For the first time in Nuremberg there will be the AIRFIX scale modelling brand and the HUMBROL line of paints. Japanese partner company TOMYTEC will also be present.**

Flanking the trade fair the new 52-page **FALLER brochure »2020 New Items No. 1«** will be published with over 170 products which will be available everywhere in specialized retailers' shops in the first half-year and on www.faller.de. Garden railway friends will be delighted to read the announcement of new and promotional items in the present **POLA G leaflet »2020 Garden Saison«**.

Focus on railway

A premiere will be the launch of the first FALLER »Roundhouse element with 12° track angle« that can be extended at will using the suitable supplementary sets. Various tilting bumpers draw the attention to tiny details. Outside the engine shed new station models for H0, N, Z and G track gauge show trains in the most favourable light.

Funfair highlight

Summer time will truly begin with the atmosphere created by the elaborate functioning model »Daemonium«, a faithful reproduction of a ghost train in XXL format with many miniature figures, motors and digital printing.

Drive kit for goods traffic centre

To allow the building of a large model terminal FALLER now launches the second container bridge-crane of its range – this time designed according to the original blue »Container bridge-crane GVZ Hafen Nürnberg«. Both container cranes can be functioning models if fitted with an optional extra. New track extensions allow longer drives on the running rails.

Outlook for 2021

To grant a glimpse of the 75th company anniversary in 2021 FALLER will present in Nuremberg the **Anniversary Model »Bran Castle«** for the first time.

Further new item announcements with market launch to come in the areas: Car System, Car System Digital, Start sets, Chassis kits, Technical equipment, Electronics, LED Lighting, Minisound effects, Distribution plates, Landscaping, Scatter materials, Vegetation, Water bodies, Kitbashing plates, Laser-cut, Laser-cut minis, FALLER CREATE 3D Printing models, Tools as well as further model highlights: Elevated railway/city railway arches, Goldbeck system insurance building, Modern fire station, Stud farm, »Westerheversand« Lighthouse, Classic models B-924 Old-town block, Promotional sets, Models of the month, Small parts, Figure sets, Garden railway, and many others more.

Do not hesitate to consult us about your interests.

We look forward to your visit in Hall 7A on Stands D-50 and D-54.

Gebr. FALLER GmbH at a glance:

Gebr. FALLER GmbH is BIG IN SMALL THINGS. The company has been manufacturing building kits and matching accessories suited to scale modelling for over 70 years now. Along with its own products FALLER also markets further brands of renowned manufacturers. Main trading area is Germany and the other European countries. The company with a long tradition was established in 1946 and has its headquarters in South Black Forest, in the vicinity of Furtwangen. It is on these premises that all products are conceived, designed, manufactured, and marketed. Worldwide.
